The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment mailed November 10, 2004.

Claims 1, 3, 11, 12, 14 and 17 were amended and claims 28-33 were added rendering claims 1, 3, 11, 12,14, 17 and 28-33 pending in this case. Examiner regrets the untimely reopening of the case and withdraws the previous rejections to further prosecute the claimed invention.

Claim Rejections – 35 USC § 103(a)

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1, 3, 11, 12,14, 17 and 28-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Li et al (U.S. 6,761,969).

Li discloses a label having a facestock layer (skin), a nano-porous layer (skin) a metal layer (interchangeable throughout the label) and a water based adhesive in contact with the lower surface of the nano-porous layer (column 2,lines 6-35) where the facestock layer may be a monolayer film or multilayer film (column 4,lines 66-67) and the water based adhesives are cold glue adhesives (column 28, lines 14-23). Li further discloses the facestock may be opaque and contain white pigments and polyolefin

Application/Control Number: 09/778,325

Art Unit: 1774

(column 5,lines 1-25). The reference discloses the facestock comprises calcium carbonate (void creating additive) and metal particles (column 8, lines 10-24) and is biaxially oriented (column 9, lines 14-15). One embodiment of the reference discloses a base or core layer having skin layer on both sides of the base or core layer (column 8, lines 43-46) where the facestock is treated and a metal coating is applied by metalizing (column 25, lines 1-10).

In instant claim 1, the phrases, 'oxidatively treated to receive a metal layer thereon' and introduces a process limitation to the product claim. The patentability of a product does not depend on its method of production. If the product in the product-byprocess claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re-Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966. Further, process limitations are given no patentable weight in product claims. Li does not show that the layers have a thickness or weight percent as in instant claimed. However, such features are properties which can be easily determined by one of ordinary skill in the art. With regard to the limitation of the thickness and weight percent, absent a showing of unexpected results. it is obvious to modify the conditions of a composition because they are merely the result of routine experimentation. The experimental modification of prior art in order to optimize operation conditions (e.g. thickness and weight percent) fails to render claims patentable in the absence of unexpected results. All of the aforementioned limitations are optimizable as they directly affect the flexibility and durability of the label. It would have been obvious to one of ordinary skill in the art to make the label with the limitations of the thickness and weight percent since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 USPQ 215 (CCPA 1980).

Response to Arguments

4. Applicant's remarks of 35 USC 103(a) as being unpatentable over Alder et al. (U.S. 5,773,136) in view of Wilkie (U.S. 6,022,612) are moot based on grounds of new rejection. Applicant's remarks to 35 USC 103(a) as being unpatentable over Alder et al. (U.S. 5,773,136) in view of Wilkie (U.S. 6,022,612) further in view of Bright (U.S. 6,485,803) are moot based on grounds of new rejection.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lawrence Ferguson whose telephone number is 571-272-1522. The examiner can normally be reached on Monday through Friday 9:00 AM – 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye, can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
